SUMMARY

2nd-year AI/ML Engineering student at St. Joseph's College building production-grade LLM systems and computer vision solutions. Specialized in emotionally-aware AI agents, RAG pipelines, and multimodal systems. 56 public repositories with active contributions to neural networks, prompt engineering, and full-stack AI deployment. Open to internships and AI research collaborations.

EXPERIENCE

IQmath Technologies

Jun. 2026 – Jul. 2026

AI Engineer Intern

Hybrid

- Gaining hands-on exposure to **Generative AI**, Machine Learning, and real-world AI application development through guided projects and industry mentorship.
- Building and evaluating AI pipelines covering data processing, model integration, and deployment on production infrastructure.

Stackrack Tech India Pvt Ltd

Dec. 2025 – Present

React & AI Developer Support Intern

Remote/On-site

- Supporting front-end development with **React** and Next.js; building responsive, performance-optimized components.
- Researching and implementing **prompt engineering** techniques for LLM integration into production applications.
- Debugging and optimizing AI model behavior; documenting best practices for reproducible AI workflows.

Inspire Softech

Jun. 2025 – Jul. 2025

Artificial Intelligence Intern

Remote/On-site

- Built interactive AI interfaces using **Gradio**; deployed HuggingFace models in Google Colab.
- Implemented conversational agents with model chaining and prompt optimization for real-time chat applications.

FLAGSHIP PROJECTS

Nova AI | Python, FastAPI, React 19, TensorFlow, LangChain, Google Gemini

Aug. 2024 – Present

- Multimodal Emotional Intelligence System combining **facial expression recognition**, vocal tone analysis, and text into a unified emotional context vector; Psychological Analysis SLM layer generates session-level well-being reports with stress profiling.
- Living memory architecture for session continuity with adaptive tone-shifting; React 19 + Vite frontend with privacy-first local data storage deployed on production infrastructure.

ExamGuard Pro | Python, FastAPI, React 19, YOLOv8, MediaPipe, Supabase, Chrome Extension

Active

- AI-powered real-time proctoring with **multi-modal analysis**: MediaPipe face detection, gaze tracking, YOLOv8 device detection, and Tesseract OCR for forbidden-content screening; dynamic weighted risk scoring (Safe / Review / Suspicious) with automated PDF reports.
- Four-layer cheat-resistance architecture: Chrome Manifest V3 extension (tab-switch, copy-paste monitoring), FastAPI backend, Supabase real-time DB, and JWT-secured multi-agent AI pipeline with WebSocket live dashboard.

StudyBuddy Pro | Python, React, Node.js, SQLite, RAG, Pinecone

In Development

- Adaptive AI-powered learning suite with offline-capable **smart quiz and flashcard generation** from student notes using local NLP algorithms; spaced repetition engine adjusts difficulty in real-time.
- Gamified productivity layer: Pomodoro timer with XP/coin rewards, daily streak tracking, and a configurable task manager; full-stack local-first architecture with JWT auth and SQLite.

- Interactive developer portfolio with **3D graphics** (Three.js + React Three Fiber), particle animations (tsParticles), and smooth transitions (Framer Motion); deployed to GitHub Pages.
- Sections covering projects, skills, achievements, and a blog; styled with Styled Components and built in React + TypeScript for type-safe, maintainable code.

TECHNICAL SKILLS

LLM & Agents: LangChain, LlamaIndex, OpenAI API, Anthropic Claude, HuggingFace Transformers, Prompt Design

ML/DL Frameworks: PyTorch, TensorFlow, Keras, scikit-learn, YOLOv8, MediaPipe

Vector DBs & RAG: Pinecone, ChromaDB, FAISS, semantic search, retrieval pipelines

Languages: Python, TypeScript, JavaScript, SQL, HTML, CSS

Backend & APIs: FastAPI, Flask, Node.js, Next.js, REST architecture

Databases: PostgreSQL, MongoDB, Supabase, MySQL, Firebase

DevOps & Deployment: GitHub Pages, Vercel, Render, Docker (basic), GitHub Actions (CI/CD basics)

EDUCATION

St. Joseph's College of Engineering

2024 – 2028

B.Tech in Artificial Intelligence and Machine Learning Engineering

Chennai, India

- CGPA: 7.51/10. Coursework: Neural Networks, Deep Learning, NLP, Computer Vision, MLOps.

CERTIFICATIONS & ACHIEVEMENTS

- **Google Cloud Vertex AI Prompt Design** – Skill Badge, Google (Generative AI prompt engineering).
- **Artificial Intelligence Fundamentals** – IBM (AI concepts, Python applications).
- **Deep Learning** – IBM; **Deep Learning using TensorFlow** – IBM.
- **Building AI-Powered Search with MongoDB Vector Search** – MongoDB (Jun 2025).
- **Introduction to Data Science** – Cisco; **Data Science Foundation** – Infosys Springboard (Sep 2025).
- **Tata Group – GenAI Powered Data Analytics Job Simulation** – Forage (Jun 2025).
- **Oracle Database Administration** – Oracle / Spoken Tutorial, IIT Bombay.
- **Community Leader** – CodeHack Pirates; organizing technical workshops and hackathons.
- **Google Developer Group (GDG) Chennai** – Member; engaging with the Chennai developer community on AI/ML and Google technologies.
- **GDG on Campus – St. Joseph's College of Engineering** – Member; participating in campus-level tech events, workshops, and AI adoption initiatives.
- **Open Source Contributions** – 56 public repositories, active GitHub contributor with focus on AI/ML tooling.
